Summer Fun! What did we do?

Britain W. Grade 5
I love gardening. I would grow flowers and plants. I have lots of plants. I have roses, lily pads, and more that I can't remember. To grow a garden, you would have to have a shovel, seeds, water, and soil. There are lots of plants out there, and I hope I will discover them someday.

Mikala E. Grade 8

This summer I didn't really do anything eventful or big. I stayed in the house most of the time, but sometimes I would meet up with my friends. We would take a walk, or go to the mall. I would also go outside and jump on my trampoline or go and tumble on the field down the street. At the beginning of summer break, I went to Virginia Beach

with my mom and dad, to spend time with my aunt, uncle, and cousins. On July 16th I celebrated one of my close friends' birthday. We went to Fun N' Stuff with a couple of other friends. I think this was the best part of my summer. I also went bowling with my two best friends. Overall, I had a good summer and the worst part was it had to end.

I went to **Cedar Point!**

Jazmine B.
Grade 6

Over summer vacation, I went to Cedar Point with my friends. We had so much fun. It was funny 'cause we got on the MaxAir and my friends started screaming when it was spinning in the air. We also got on the Gatekeeper, the Tiki Twist, and the Ocean Motion. Then we went to eat at Subway. After that we got on water rides. We had fun, but we were mad because the water had our clothes smelling really bad. Then three weeks later, me and my family went out of town because it was my cousin's graduation party. Then, the next day we left and went back home. When we got home, I went to my friend's sleepover. We had pizza, ice cream cake, and hot chips. We stayed up telling scary stories, watching scary movies, and playing games.

I visited my **grand- father!**

Jason Michael G. Grade 2

I went to Florida and went fishing with my grandpa. I was happy to go fishing, and I went to the pool. The worst summer was when I went to a summer camp and walked around the park. Next summer I want to go to Mississippi with my family. I want to see my grandparents. I learned not to play with my grandparents.

I went to **Universal Studios!**

Shaki W. Grade 4

summer time & beach time & outdoor time & fun time

Aidan M.

Grade 1

Over summer vacation, I did not do anything except watch TV.

Gabrielle M.

Grade 4

What I did this summer is that I got to go swimming. Another thing I did in the summer was go skating with my friends to have fun and dance. I would go on field trips because I was at camp. It is called Fatima Family Center. Also on Labor Day, we had a cookout inside because my mom is always mad at the bugs.

Braylen T.

Grade 2

I went to the beach with my sister and my sister's boyfriend. I climbed the rocks by myself. I was happy to climb. Next summer I want to go on a vacation with my whole family with a hot tub and I want to go to bed. This summer vacation I learned math.

Andrea R.

Grade 8

For summer vacation I went places and did summer camp. I had fun. One place I went was Myrtle Beach with my mom. I also went to Arizona with my mom and grandma to see my brother. He lives with us now. For summer camp, I did O.D.A. (outdoor academics) summer camp with my friends and had fun. That was my summer vacation.

Jamaya G. Grade 8

The first thing I did this summer was perform at Playhouse Square with my African dance group. Then I went to Jacksonville and Orlando, Florida with my grandmother. The best time I had was going to Disney with my family. I also had to go to camp, which was the worst part because the place was dirty. My family and I went to Virginia for the 4th of July, which was special because we had never spent the 4th of July in Virginia before. Before camp started, my daily routine was different. Sometimes I would stay up until 7:30 am, or I would fall asleep at 12:00 am and wake up at 1:00 pm. After camp ended, my routine went back to normal. This summer I learned that I was smarter than everyone at the camp I attended.

Sweet Dreams

Kids share their hopes for the future

Autumn A. Grade 3

When I grow up I want to be a hairstylist because I want to do hair. I like doing hair because I watch my mom do my sister's hair. I just love to do people's hair because it is a lot of fun and I just like to make money. My mom does not like to do people's hair but she likes doing my hair. My hair is soft and in college you have to do homework and take tests.

Taylor B. Grade 5

If I could travel in time, I would go to the future when I'm a doctor. I would go into the future. Yes, I would change history. No, I would not change a thing about my life. One day I think time travel will be possible because of the advancement in technology.

Camille W.

Grade 3

I like sports a lot. My favorite sport is gymnastics. I used to play gymnastics in the summer. My favorite athlete is Gabby Douglas because she inspired me to follow my dreams. Even when she broke her leg, she still tried.

Responsibility

Amil S. Grade 6

A leader is someone who stands up for their actions. I'm a leader when I play basketball with my teammates. If they don't know what to do or what the play is, I'll step up and tell what's going on.

Vaughn H. Grade 5

I don't like gardening because it's a lot of responsibility. One thing I like about gardening is you get fresh food. I don't have a garden, but if I did I would grow tomatoes. I grew my first plant with my grandma, and she went to school to learn how to be a gardener. I have zero plants at my house. Items needed to grow plants would be dirt, water, sunlight, patience, and seeds.

Jordan D. Grade 7

To be a leader means to lead the way for others and to not follow anybody, to pioneer. Traits would be honesty, leading out of conflicts, being not afraid, and creative... [M]y sister looks up to me, as do my younger brother and sister. In school when me and a friend were line leaders in K-4, whenever we would go somewhere as a class, there would always be a line leader. It made me feel important to other people, such as my classmates, my teachers and other students. It also made me feel cool.

Would you rather... learn from the past?

Jamie O. Grade 9

If I were to travel back in time, I would go see my great grandfather Jesse Owens to ask him why he kept going, like why he kept trying even though there were so many obstacles. I feel that there really wouldn't be any purpose in trying to change history, and even though there were many unfortunate events, I feel that they all happened for a reason, like there was an action that caused this event. If I could change something about my past, I would do way more sports than what I did when I was little. Personally, I think there would be no point in trying to change history because we don't know how that would affect the present.

Jamoyo G. Grade 8

If I could time travel, I would go to the past to find out what happened to the people of Roanoke and the future to find out what I become. I would change every major mistake I made in the past. I think time travel will be possible because I am smart and can accomplish anything I put my mind to.

or

Would you rather... discover the future?

Zoey Y. Grade 3

If I could time travel, I would go to New York and live there with my parents and friends. I would work as a model and become famous and rich, and then give some money to the whole world and meet

Ariana Grande.

Maliq H. Grade 1

If I could travel in time I would travel to the future! Why? Well, right now, I have a very successful Youtube channel! I have a solid 90 subscribers! What will happen from here though? Will it fall apart, or keep building up fame and subscribers? I am very VERY excited, terrified of results, and suspensful about all of it! I won't be able to know before hand though! Because time travel is way to sophisticated to even build a very complicated machine that knows everything that will and has happened!

Regen S. Grade 10

I would travel to the past to try to have some sort of influence in climate change. It would be hard, especially if I were to go back to the Industrial Revolution. Maybe I would just go back to the Baby Boomers and help to make things more eco-friendly to leave smaller carbon footprints (that we're dealing with now and on into the future). If scientists could find out how to reach the 4th dimension, time travel might be possible.

Marquis H. Grade 5

If I could change any point in my lifetime, it would be the times I didn't get a part in my school plays. The first one is when my school did The Lion King and I auditioned for young Simba. When this happened, I was in kindergarten and very shy. I was in the music room and it was my turn to sing, so I opened my mouth and sang very low. If I traveled back in time, I would have told myself, "Come on, you can sing louder than that! Close your eyes and act

like you're at home in your room with the door locked." I'm positive I would have listened to myself and sang louder and got the part. Second, I would go back to when we did "The Gram Awards." We were doing lines and I wanted to be Jack and the Beanstalk, so the teacher let me read that. If I could go back, when it was my turn I would speak louder and be more confident so I could get the part.

Mizan B. Grade 11

If I could time travel, I would go to my future self to see the contribution that I've made to society. If I wasn't happy with my life or career, maybe I could fix it before I made difficult decisions that are challenging to come back from. Although, technical and scientific innovations are being thought of and worked on as we speak. I do not believe that time travel will be a thing in this lifetime because as far as I know, our scientists aren't at that advanced stage of innovative thoughts. Even so, television and movies are clearly developing theories, and since in them it has been made possible, I believe they are just hoping no one's who's watching is thinking too deeply into their algorithms to investigate.

Kayla T. Grade 4

I would go to every place in the world and learn every language there is in the world and go to the Moon, and go to my funeral and to see how many kids I have and to see how many grandchildren I have, and my grandchildren's kids and their kids.

Activity Corner:

Space Edition

tongue twisters (medium)

Saturn spins singing songs to the sun.

The smelting sun sits & shifts shining in the sky.

Maurice's mother's spaceship miraculously melted on Mars.

Unscramble these words! (hard)

1. oibrt _____
2. teapln _____
3. siepcle _____
4. nootcialestntl _____

The Saturday Tutoring Program

FREE academic assistance or enrichment
for students in Grades 1-12 from any
school district in Greater Cleveland

**Saturdays from 9:45 a.m. to noon at
The Church of the Covenant**

11205 Euclid Avenue
in University Circle

Register NOW!
Call 216-421-0482 ext. 281, or
e-mail SaturdayTutoring@gmail.com

Tutors are knowledgeable, caring volunteers
from local colleges and the community

Sessions are supervised by retired teachers

Tutors can help with:

Homework assignments

All class subjects:

reading, math, science,
English, social studies

Test preparation:

Ohio Achievement Assessments (OAA)

Ohio Graduation Tests (OGT)

ACT and SAT

College and scholarship searches

College and scholarship applications

For more details, visit www.SaturdayTutoring.org

Reach Out and Read Greater Cleveland is pleased to support Young Writers of Cleveland's efforts to encourage children to write outside of the classroom.

When families read aloud to their young children, they can give them a better start to life. With unparalleled access to families with young children, Reach Out and Read medical providers give books to children at more than 10 well-child visits from infancy until they start school. More importantly, they encourage families to read aloud and engage with their infants, toddlers and preschoolers every day.
